

Alkaline batteries

For standard energy absorption

Reliable and safe batteries, ideal for everyday use, suitable for low and constant consumption devices such as scales, remote controls, watches, etc.

With anti-leak-protection

They retain their energy charge for up to 7 years if unused

For high energy absorption

Suitable for high consumption devices such as flashlights, work lamps, smoke detectors

With triple-tough-protection to ensure a constant flow of energy, avoid coating layers peel off and battery malfunctions

With anti-leak-protection

They retain their energy charge for up to 10 years if unused

Special batteries

Superior quality mercury-free batteries, offering reliable energy and maximum performance even in extreme temperatures

Particularly suitable for digital gauges, micrometers, measurement instruments in general, watches, flashes, remote controls for gates and vehicles

The special sealing technology ensures excellent resistance to liquid leakage

Without added mercury

They retain their energy charge for up to 3 years if unused
