

martor Test cards for metal-detectors

Suitable for setting metal-detectors before doing foreign body checks
To do this test, the test card must be passed through the detector, with the product to be checked

Come in a **set of 5 pieces with sample, size Ø 2,5 - 3,5 - 5 - 6,5 - 8 mm**

Tried and tested in the food and pharmaceutical product manufacturing sector

Can withstand temperatures from -40°C to +70°C

Paper type, with sample sealed in a small plastic envelope

Light-weight, does not sink into the material tested

Dimensions 55x85 mm

Code M 7085 1000	M 7085/1	Each €	 1
------------------	-----------------	--------	---

Acrylic type, with sample firmly fixed in the material

Strong and reusable a number of times

Dimensions 55x85 mm

Code M 7085 2000	M 7085/2	Each €	 1
------------------	-----------------	--------	---

ABC TOOLS Safety knives

Box cutter with hidden blade. The blade is not "open", in fact its cutting edge is hidden in the cutter's body

This makes it possible to always have the highest degree of safety from cutting dangers and amply protects the packaged goods

Type entirely in plastic

For right- and left-handed use

Carbon steel blade

Cutting edge of the blade hidden for maximum user safety

Suitable for cutting cardboard, film, adhesive tape, bagged products, rolls of paper, etc.

"Disposable" knife, with fixed blade

Cutting depth 5 mm - Overall length 117 mm

Code M 7088 1003	M 7088/1	Each €	 10
------------------	-----------------	--------	--

Type with interchangeable blade

Body in plastic material with non-slip rubber insert for better grip and less fatigue

Carbon steel blade

For right- or left-hand use

Suitable for cutting cardboard, film, straps, etc.

With metal plate ideal for cutting adhesive tape

Cutting depth 4 mm - Overall length 165 mm

Code M 7088 4003	M 7088/4	Each €	 1
------------------	-----------------	--------	---

Spare blade for M 7088/4 - **0,35 mm thick**

Code M 7088 8000	M 7088/8	Each €	 1
------------------	-----------------	--------	---

SAFETY SIGNS

A wide range of safety signs custom made to suit your needs is available on request, made in compliance with Legislative Decree n° 81 09/04/2008, and with standard UNI EN ISO 7010. Their dimensions, and chromatic and colorimetric characteristics, comply with what is indicated in UNI 7543.

Made mainly with aluminium plates with thicknesses between 5/10 and 10/10 mm, they are suitable for outdoor use, and can last a long time even in difficult weather conditions.

The printing is carried out on:

- Adhesive laminated vinyl film, with excellent resistance to ageing, and to atmospheric and chemical agents.
- Treated rigid PVC, with thickness between 1 and 1.5 mm, also suitable for lasting a long time.
- Reflective, ideal for environments with insufficient lighting, it is a smooth, self-adhesive reflective film.
